

Kaizen Foundation Series

Visual Management Master Class

Visual Management is an essential element of lean management, allowing issues to quickly be identified and addressed.

The process of kaizen cannot begin in a workplace without first uncovering issues. Making issues visual empowers your workforce to identify when and where the issues occur allowing action to be taken in a timely manner. Further, significant improvements can be realised through simply visualising the current state of operations and increasing employee awareness.

Join this one-day master class to see how visualisation of your workplace can become a powerful management tool. Learn through examples from some of the leading lean organisations in the world. Take away ideas and strategies that will assist in strengthening your organisation's foundations for continuous improvement.

Visual Management Topics

- Workplace visual management
- Current situation visualisation
- Quick issue and waste identification
- Appropriate usage of andon
- Visual management boards

By participating in this master class you will:

- Understand the role of visual management in kaizen
- Identify techniques to improve your workplace through visual management
- Create a foundation for continuous improvement in your workplace
- See how the world's leading lean companies manage through visualisation
- Discover how sharing workplace information can directly impact on your KPIs
- Learn how to structure your organization to benefit from visual management

Kaizen Foundation Series

This Master Class is part of the Kaizen Foundation Series. Additional one-day seminars will be held in 2015 covering the key foundations for kaizen – including Lean Leadership, 5S and Standard Work.
