

Lean Consulting and Training

Practical Support for Your Lean Journey

Shinka Management helps organizations improve productivity, quality, delivery, safety and employee engagement by turning lean principles into practical daily management. Our global team includes veteran Toyota factory managers and Japan-trained senior consultants with experience supporting clients in more than 70 countries.

Shinka Management provides customized consulting and training tailored to each organization's priorities, operating environment and level of lean maturity.

Our consultants work alongside leaders and frontline teams to assess performance, develop practical improvement plans, support implementation and build the capability needed to sustain results.
