

The Lean Essentials

DEMYSTIFY THE APPLICATION OF LEAN IN YOUR BUSINESS

LEAN DOESN'T APPLY TO OUR BUSINESS...

A common statement heard across Australia. Yet Japan has successfully applied lean in every corner of industry.

It is a case of understanding its right application in the right situation - not a case of making a round peg fit into a square hole.

Shinka Management partners with the Australian Industry Group and Japan Management Association Consultants to bring you the lean essentials.

This is a one-day intensive overview with practical components. It demystifies the fundamentals behind how lean can be applied to YOUR business.

Shinka Management specialises in the transfer of Japanese lean management know-how to local Australian companies.

Through **Japan Management Association Consultants**, we directly utilise the know-how and expertise of 70 years experience in the development and application of lean.
