Start your Kaizen Activities
Anytime, Anywhere
at your Fingertips

Why Mobile OTRS?

DX tool for immediate, on-the-spot improvement for anyone, anywhere, anytime

1

Easy video recording using a smartphone. Analysis can be done directly while on-site.

Accelerate information sharing by video comparison

2

Video documentation makes it easy to present analysis results. Information sharing is also a lot easier.

Link with PC version of OTRS10 and increase your data utilization

3

Manuals can be created on PC from data on iPhone/iPad, and data created can be carried on-site as well. Recording and analysis data can be used more flexibly.

Mobile OTRS is a mobile app to support Kaizen activities by using mobile technology.

Promote DX and improve your productivity

Functions

1. Video Recording

Video recording can be done in landscape mode (zoom available), using the format of MP4. Professional Model has Real-time Analysis function that enables you to record the video and divide elements / analyze cycles at the same time.

*Up to 60 min. recording time

*Up to 200 video files

2. Work Analysis

Analyze the work time of recorded video and analytical data.

*Up to 100 elements

*Up to 20 cycles

3. Aggregation

Display cycle tabulation of totals up to the cycle in which the analysis was performed.

4. Comparison

Comparison and playback of two specified analysis data videos can be displayed from the home screen and the Line Balancing Chart screen.

5. Standardized Work Combination Chart

Displays the best lap in Standardized Work Combination Chart based on the element time and Combination Chart Category analyzed in the work time analysis screen.

*One axis only

6. Line Balancing Chart

Displays best lap cycle table and variation based on element time calculated in the Work Analysis screen.

*Up to 2 axes

7. Save and Output Data / Linkage

In addition to PDF/CSV output, OTRS10 linkage is available.
